PROFESSOR OF NATURAL HISTORY: MICHAEL SWANN, M.A., PH.D.

15th June

Dear Josh,

We plan to arrive in San Fransisco on flight TW.527 at 8.25 a.m. on 1st July. We'll come on out to Palo Alto as quickly as we can.

I'm still full of optimism about the BSA paralysis experiment. But none of Dresser's efforts here to break tolerance of BGG with adoptive immunisation have worked - much to our surprise. But I have no doubt that time will not be waisted, if I look into the kinetics of induction to start with. And I feel that antibody quality may tell one something about convalescent cells.

*Yours over,*

*Anno*
